

**AWARENESS AND ADOPTION OF IMPROVED TECHNOLOGIES
AMONG SMALLHOLDER RUBBER FARMERS IN SEETHAWAKA
DS DIVISION, COLOMBO DISTRICT**

ABSTRACT

A study was carried out to identify rubber farmers' awareness and adoption of improved technologies in the Seethawaka DS division, Colombo District. By following a random sampling procedure, 100 rubber farmers were selected, and a structured interview schedule was used to collect the information through personal interviews. The collected data were analyzed by using the SPSS package. The frequencies, percentages and correlation coefficients were used to interpret the results.

The results revealed that the average age of rubber farmers was 45-55 years old, 81% of farmers were males, and 19% of farmers were female. The average educational level of the farmer was up to the secondary level. The average family size was four members, and the average income (farm and off-farm) was Rs. 67210.00 per month. Most of the farmers had 20-30 years of farming experience in rubber cultivation. Their social participation and engaged with the extension activities were very low. Most male persons participated in various activities under Rubber cultivation, but female participation was high in the activity of tapping. Most respondents had some idea about the improved rubber technologies, but no one adopted those technologies.

LIST OF TABLES	vi
LIST OF FIGURES	viii
ABBREVIATIONS	ix
CHAPTER 01	1
1.0 INTRODUCTION	1
1.1 Rubber.....	1
1.2 Current Situation of the Rubber Industry in Sri Lanka.....	2
1.3 Profitable Natural Rubber Cultivation	4
1.3.1 Enhance the Rubber Productivity	5
1.3.2 Possible Factors.....	5
1.3.3 The Way of Forward.....	6
1.4 Importance of Technology in the Rubber Industry	7
1.5 Research Problem	8
1.7 Limitations of the Study.....	9
CHAPTER 02	10
2.0 LITERATURE REVIEW	10
2.1 Rubber.....	10
2.2 Origin and Distribution of Rubber	11
2.3 Applications of Natural Rubber	11
2.4 Modern Technology in Rubber Cultivation	12
2.4.1 Modern Propagation Techniques of Rubber Plant.....	12
2.4.2 Micro Irrigation.....	13
2.4.3 Tapping Machine	15
2.4.4 Low-Intensive Tapping Systems.....	16
Benefits of Low-Intensity Tapping Systems.....	17
2.4.5 Gaseous Stimulation System.....	18
Use of Gaseous Stimulation System in Sri Lanka	19

2.4.6 Remote Sensing Applications	20
CHAPTER 03	23
3.0 RESEARCH METHODOLOGY	23
3.1 Survey Design	23
3.2 Study Area.....	23
3.3 Selection of Sample	24
3.4 Data Collection	25
3.5 Data Analysis	25
3.6 Methods used for measurement of the dependent and independent variables	26
CHAPTER 04	30
4.0 RESULTS AND DISCUSSION	30
4.1 Socio-economic data of the Rubber farmers	30
4.1.1. Age	30
4.1.2. Gender	31
4.1.3. Family size	31
4.1.4. Educational level.....	32
4.1.5. Main occupation.....	32
4.1.6. Land size	33
4.1.7. Farming Experience	33
4.1.8. Monthly farm income.....	34
4.1.9 Monthly off-farm income.....	34
4.1.10 Social Participation	35
4.1.11 Awareness of Extension Activities	35
4.1.12 Gender Participation in Farming Practices	36
4.1.13. Relational analysis among independent variables	37
4.1.13.1. Correlation between monthly farm income and the size of land holding	37
4.1.13.2 Correlation between the Respondents' Age and Experience of rubber cultivation	38
4.2 Awareness and Adoption of improved technologies	39
4.2.1 Awareness of improved technologies	39
4.2.1.1 Micropropagation.....	39
4.2.1.2 Sprinkler Irrigation.....	39
4.2.1.3 Drip Irrigation	40
4.2.1.4 Using the Tapping Machine.....	40

4.2.1.5 Low-intensity tapping systems.....	41
4.2.1.6 Gaseous stimulation system	41
4.2.1.7 Remote sensing applications.....	42
4.2.2 Adoption of Improved Technology.....	42
4.3. Factors affecting the adoption of improved technologies among rubber farmers	43
4.3.1. Technical factors	43
4.3.3. Economic factors.....	44
4.3.3.Socio-psychological factors	45
4.3.4. Environment factors.....	45
